**Erik Murphy of SymQuest® Group receives  
HP Enterprise Solutions Certification.**

Keene, NH – Larry Sudbay, President and Chief Executive Officer of SymQuest Group, Inc. announced today that Erik Murphy, Director of Business Development has achieved the Hewlett-Packard (HP) Certification for Enterprise Solutions as part of the HP Certified Professional Program.

With this certification, Erik Murphy joins a worldwide team of highly skilled IT professionals who display an ongoing commitment to professionalism, quality and excellence. The HP Certified Professional Program is a benchmark of competency and credibility for both business and technical skills, and identifies and rewards experts in HP products and solutions. HP Certified Professionals have exclusive access to HP resources, product and solution information and many other tools.

As Director of Business Development, Erik helps clients carefully plan their IT investments in order to improve business performance at all levels. In particular the HP Enterprise Solutions Certificate also demonstrates expertise in consultation on HP-Lefthand SAN and EVA storage solutions that offer efficient storage utilization, optimized performance, simple management and cost-effective disaster recovery. As a result, SymQuest clients now have a broader range of storage options from which to choose.

“We are proud to maintain this level of professional development which builds and validates industry-valued competencies,” stated Sudbay. “Not only does it allow us to provide the best quality IT experience for our customers, it is crucial to the development of our technical professionals.”

*Erik Murphy, Director of Business Development, SymQuest® Group, Inc.*
